

Circle Of The Night

Em D G D EM D Em
I saw you walking in the shadows in the circle of the night
D G D Em D Em
I met you by the broken stairway beneath a burnt out light
G D Em D C D
And while all the jealous jokers watched, we embraced in the dark
Em D G D Em D Em
In the space of a second we both knew we shared the magic spark

The midnight hustlers seemed to fade in the circle of the night
The line of cars in an endless parade, drifted in and out of sight
We walked and talked arm in arm, down the midnight avenue
But I kept wishing I was some place else in some room alone with you

Later on I watched you sleep in the circle of the night
Then we were lovers entwined in the morning past the hour of light
And every time I looked in your eyes your face seemed to change
Then our smile of pleasure would draw us closer till nothing at all seemed strange

I met you walking in the shadow in the circle of the night
We parted as the morning ended, I watched you vanish from sight
Leaving me with just a memory, a face and a first name
But if I were to see you again, we'd end up just the same
